

UPDATED: January 28, 2015

To Whom It May Concern,

Solectria Renewables is a premier manufacturer of grid-tied photovoltaic inverters for use in renewable energy applications; including utility, commercial and residential systems. We employ the majority of our associates in our Lawrence, Massachusetts facility.

Quality American manufacturing is a tradition that our employees are proud to follow. 100% of our three-phase central inverters (PVI 50/60/75/85/100KW, SGI 225/250/266/300/500/500PE, SGI 500XT, SGI 500/750XTM), and our string combiners and disconnecting combiners are assembled by American workers onsite at our Lawrence, Massachusetts factory.

At Solectria Renewables, we strive to use only the best American-based raw materials and domestically sourced subassemblies. We purchase nearly 50% of our components from MA manufacturers and another 30% from US suppliers.

Solectria Renewables is proud to carry the badge of "Made in USA".

Sincerely,

A handwritten signature in black ink, appearing to read 'Vyhanek', is written in a cursive style.
